

INTERNATIONAL ENERGY COOPERATIVE ("IEC") ENERGY SOLUTIONS

REVISION III

ASSOCIATED OIL offers oil, gas, and derivatives from worldwide sources and opportunities to construct pipelines, conversion/refining, and transportation facilities.

THE ENERGY EXCHANGE offers oil & gas projects and producing properties anywhere in the world.

Technology and equipment are also available for clean recovery of water used in drilling.

POWER TUBE INC offers unique technology to produce electricity extracting only heat from the earth, expanding dramatically the possible areas for geothermal energy utilization while eliminating environmental problems associated with toxic steam extraction.

POWER AVENUE CORPORATION patents offer the means to develop a world energy economy based on economical and plentiful hydrogen production and use to fuel electrical power generation, as needed, anywhere in the world.

Technology is available to clean coal, converting toxic elements into industrial products and extracting oil, leaving only "clean coke" that is lighter and less expensive to ship; and, the coke will burn clean to produce electricity, clean ash, and carbon dioxide.

The ash, instead of creating toxic landfills, can be used to manufacture construction and paving materials, and the carbon dioxide can be fed into ponds to be consumed by algae; pumping oxygen into the atmosphere and providing algae for medicinal, biodiesel, and organic fertilize production.

Parts of this technology can also be used to eliminate toxic elements from tar sands or shale produced oil prior to pipeline transport.

Solar, wind, and other energy technologies, and even recovery of energy use expenditures, in addition to the above, can be funded.

Funding shall be accomplished by customizing use of the protocols of [MAKING MONEY BY PURCHASING](#) in the TEXAS HOLDINGS, INC. BUSINESS MART.

A TEXAS HOLDINGS, INC. BUSINESS MART CALL CENTER can help implement customized solutions.
